## **INTERNET ACCEPTABLE USE POLICY**

### **Introduction:**

The students of Newdegate Primary School have access to the Internet for the purpose of supporting their educational programs. The use of the Internet is an important tool for learning and allows the children access to current worldwide information and resources.

Unfortunately, the Internet also allows access to undesirable and inappropriate material.

The purpose of this Internet Acceptable Use Policy is to ensure that students at Newdegate Primary School use the Internet in an appropriate manner. Students will be under teacher supervision when accessing the Internet, however, the students themselves must take responsibility for their behaviour. The school will educate the children in acceptable use of the Internet and students will be made aware of the consequences should they choose to use the Internet inappropriately.

### **Student Acceptable Use Guidelines:**

1. Students will only use the Internet for accessing appropriate material that is relevant to their work.
2. If students accidentally access inappropriate material, they will back out of the site immediately and inform the teacher.
3. If students deliberately access inappropriate material, they will be immediately removed from the computer and be banned from using the Internet for one month. If the incident happens again, heavier penalties will occur.
4. Students will be supervised at all times when accessing the Internet.
5. Students will seek permission from the teacher before downloading programs or files.
6. Students will not participate in Chat lines, Newsgroups and/or FTP components of the Internet.
7. Students will not post personal contact information about themselves or any other person on the internet. They should use first names ONLY.
8. Students will use appropriate language on the Internet at all times.
9. Students will respect each other's privacy when using email and will not read other people's emails without their permission.
